I grew up on the western plains of Australia, and I definitely think it would be possible to build a solar based solution for distillation. I also wonder if it'd be ...

While it is the same type of alcohol as found in alcoholic beverages, it is most often used as an alternative to gasoline in transportation, either as a pure fuel or ...

Many distilleries have taken steps to reduce the negative environmental impact of alcohol production. Here's how distilleries are becoming ...

Ethanol has emerged as a crucial player in the realm of renewable energy, offering a sustainable alternative to traditional fossil fuels. Its ...

Alcohol--already a key contributor to an array of health, social and economic burdens--exacerbates climate change in several ways, starting with production right through storage ...

Ethanol vs. Renewable Electricity: The surge in renewable electricity generated from wind and solar sources presents another layer. While ethanol provides a ...

A "carbon sequestration + power generation" direct alcohol fuel cell is developed to achieve zero carbon emissions, utilizing CO₂-derived alcohol fuel to simultaneously co-produce ...

Decreasing Distilling's Energy Use
Improving Base-Material Agriculture
Greening Ecosystems and Helping Communities
Reaching Across The Bar
Unlike with wine, for which glass is the major culprit, the biggest share of spirits emissions--36 percent for column stills and 40 percent for pots--comes from distillation itself. GHG savings lie in employing renewable energy and maximizing efficiency in the process. This year, Tattersall Distilling installed the nation's largest solar array in a dis... Ethanol has the advantage of being a transportable fuel, making it easier to incorporate ...

Yes, you *can* infuse alcohol using solar heat in a closed car--but it's unpredictable, potentially unsafe, and rarely produces consistent, high-quality results. Here's what science, safety, and real-world ...
