-----

Base Support Plan (BSP)--Primarily developed for locations with a permanent AF presence, and is fully developed by the collaborative planning efforts of many functional experts with a deliberate planning ...

presents a following method: location selection and network optimization for the wireless communication network. First, it collects the experimental data set of base station locati.

Firstly, this paper outlines the site selection issues for communication base stations, considering the varying communication needs of users and constructs a site selection model for ...

In this paper, we address the classical problem of locating base stations for a mobile cellular network to serve mobile users in a given geographical area considering the users" ...

This method enables the system to dynamically select the positioning base station when positioning target in the detection area. DBSS mainly include three steps: nearest base station calculation, ...

This paper establishes a mathematical model for siting base stations in hilly environment scenarios, designs a base station location method based on the improved K means algorithm and...

In this paper, to address the site planning and area clustering problems of mobile communication networks, the K-mean clustering algorithm, linear programming,

Based on the principle of priority business volume and the cost performance of base station, this paper establishes a set of models to solve the site selection planning problem of urban base station.

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station ...
