The Department of Energy, MoENR announces the commissioning of Phase I (17.38 MWp) of the Sephu Solar Project in Sephu Gewog, Wangdue ...

With rising temperatures and erratic rainfall threatening its energy lifeline, Bhutan is quietly investing in solar power as a resilient alternative to secure its future.

Bhutan unveils its National Solar Energy Roadmap, leveraging solar plants and renewable energy to bolster energy security and achieve self ...

Bhutan Solar Initiative Project (BSIP) set up under Royal Command has implemented two Solar PV Projects in Thimphu. 250kW Rooftop Centenary ...

The first phase of Bhutan's first utility-scale solar power project at Sephu in Wangdue Phodrang is set for completion by March next year. A utility ...

Bhutan offers a unique opportunity for high-impact solar development, particularly in remote mountain communities and as a support system to its hydropower base.

It contains the planned dam, reservoir, waterway and powerhouse. This data provides the potential utility scale solar PV sites across Bhutan identified as part of the National Solar Energy Roadmap.

The Sephu Solar Project in Bhutan will be the first utility-scale alternative renewable power plant in the country and the first step to diversify the generation portfolio of Bhutan's hydropower dominated ...

As hydropower-rich Bhutan pursues solar to diversify its renewable energy source and maintain carbon neutral status, UNDP is supporting the government in shaping a private sector led ...

Understanding the feasibility of solar photovoltaic systems is crucial for Bhutan as it aims to enhance its

Bhutan solar system

energy resilience and reduce reliance on power imports during the winter months.
