Brilliant Light Power, Inc. (BLP), formerly BlackLight Power, Inc. of Cranbury, New Jersey, is a company founded by Randell L. Mills, who claims to have discovered a new energy source from what he says is the electron in a hydrogen atom dropping below its ground energy state into a "hydrino state". The claims lack corroborating scientific evidence and the proposed hydrino states are unphysical and incompatible ...

The SunCell[®] can power these devices completely autonomously of fuels and grid infrastructure, operating in essentially any environment at greater power density and power to weight ratio than any ...

To pick the best solar generators, we tested some of these power stations for charging capacity, ease of use, weight, and different use cases. ...

Raising equity funding to further develop and engineer the SunCell[®] product family to harness the power of the Hydrino[®] into various energy markets from the current commercial-scale ...

At Brilliant Solar, we've been powering homes and businesses with clean, renewable energy since 2017. Our recent installations highlight the latest in solar technology, helping customers save on energy ...

Cardinal Plant is an operating power station of at least 1880-megawatts (MW) in Brilliant, Jefferson, Ohio, United States.

This system allows for solar energy to be used even when there isn't access to the grid. The solar panels are mounted on top of the pergola at an angle to receive the maximum amount of sunlight ...

Brilliant Light Power (BLP), under the leadership of Dr. Randell L. Mills, continues its pursuit of commercializing the SunCell[®], a device that ...

We provide reliable, affordable, environmentally-responsible power for Ohio cooperative members and

Brilliant Solar Power Station

consumers. The U.S. Department of Energy (DOE) has selected Cardinal Plant as one ...

Brilliant Power was found in 2014, committed to be an integrated mining solution leader. The headquarters is located in China with European ...
