The construction costs itemized in Appendix 12.3-A1, 12.3-A2, 12.3-A3, and 12.3-A4 are to aid the user in estimating the cost of bridge and structure projects. The costs are based on historical data ...

A sample spreadsheet is included to illustrate how Life Cycle Cost Analysis (LCCA) might be used to evaluate different aspects of a project. A service life / design life table is also included for reference.

National Engineering Technology conducted research on current life-cycle cost analysis bridge life-cycle cost estimation, and computer-based government transportation agencies.

Learn what lifecycle cost analysis (LCCA) is, why it matters for roads, bridges & utilities, and the 6 steps to run one--plus ROI stats.

Historically, BLCCA has been used to select maintenance strategies but not to perform a comprehensive life-cycle cost profile (LCCP) selection. Therefore, this paper focuses on selecting ...

Bridge construction costs may vary year to year. To minimize this variation, an average unit cost is used as it is a good measure of central tendency. The use of average unit costs has ...

This paper summarizes some of the recent accomplishments and delineates the future challenges in life-cycle cost analysis for highways bridges. The study is intended to provide the necessary background ...
