Cuba is investing in solar energy and battery storage to address its severe energy crisis, reduce dependency on fossil fuels, and improve the reliability and stability of its power supply.

We welcome collaboration opportunities from chemical and battery manufacturers.

A new lithium refining method uses electrochemistry to cut waste and energy use, easing a key bottleneck for electric vehicles.

This article highlights the top 10 battery manufacturers in Cuba, including those that provide domestically produced and imported battery technologies. These manufacturers play a crucial role in supporting ...

In an effort to strengthen the local industry and ensure efficient and competitive production, CIRCE has provided specialized training to the GEDEME team, focusing on the entire value chain of lithium ...

This study investigates long-term capacity degradation of lithium-ion batteries after low temperature exposure subjected to various C-rate cycles. Findings reveal that low temperature ...

SUNDTA has announced the successful completion of production and factory testing for a significant order of its advanced high-voltage rack ...

Nickel and cobalt are refined in Fort Saskatchewan, Alberta, Canada from mixed sulphide intermediate prepared at the mine and processing plant in ...

This article explores active initiatives, their applications, and how companies like EK SOLAR contribute to Cuba's energy transition through cutting-edge solutions.

Based in Matanzas, this supplier specializes in heavy-duty li-ion battery breaking and separating equipment

Cuba low temperature lithium battery processing

that can process 2,000-2,500 kg per hour--ideal for handling the growing ...
