Learn how Environmental Impact Assessments ensure the sustainable development of renewable energy projects, protecting habitats, ...

If the LEPC is listed, wind, solar, power line, and communication tower projects within the Plan Area on land that was not previously enrolled in the CCAA would need to pursue other avenues to maintain ...

Understand the complexities of siting and permitting wind energy projects, including federal and state regulations, environmental reviews, and strategies to address ...

As reflected in DOE's current categorical exclusions encompassing solar PV, power lines, and battery and flywheel energy storage, DOE has already determined that these projects do ...

As a result, the economic and environmental impact assessment (EEIA) of RE integration has historically been conducted as a prerequisite for the initial evaluation and screening of ...

An environmental impact assessment (EIA) is an assessment of the possible impact (positive or negative) that a proposed project may have on the environment, ...

This includes engaging with stakeholders, facilitating environmental research and disseminating results on cost-effective approaches to monitoring and minimizing ...

The goal of this work is to evaluate the lifecycle performance (construction and operation-related impact) of large-scale solar and wind energy ...
