Build your own solar-powered car in this fun science project. Optionally, you can enter your car in Junior Solar Sprint, a regional competition for solar-powered cars.

on this video, I will show you how to make a solar electric car. I assembled electric bicycle drive wheels with a welded steel frame. the solar panels give a power of 200w and in 2h30 fully...

This work is on a four-wheeled solar electric powered mobility scooter for handicapped and aged for indoor and outdoor use. Moreover, it has been specifically designed for a particular patient who is ...

One of the possible solutions is solar-powered electric vehicle (SPEV); the solar-powered EV can self-charge its batteries without any turbulence caused to the environment. This paper ...

Shell hosts this event each year so that students across the United States can compete and represent their university or college. The car must be solar-powered, allow for one driver, have four wheels, fall ...

This vehicle is powered by solar panel but in rainy season this can't work at its fullest power so we added a plug in charger and also the battery is detachable for charging purpose.

Their 2019 four-person solar vehicle, Stella Era, advanced this clean energy legacy by integrating several new innovations - each one a first in the ...

Harness the power of the sun with Aptera. Designed with ~700 watts of integrated solar cells, drive up to 40 miles per day completely off the ...

A prototype has been developed using four DC motors mounted on a four-wheeled chassis. The front wheels are powered by two batteries to move ...

# Electric Four-wheel Solar Power Generation Project

In the current study we report design and testing of a light-weight electric/solar four- wheel drive ca rt capable of running at speeds in the order of 30mile/hour.
