Slovakia is poised to significantly reduce its reliance on Russian gas, driven by European Union plans and a shift in supplier strategies. This transition involves potential financial support from ...

Slovakia and Hungary are temporarily exempted from the EU ban on importing Russian oil, owing to its importance for their energy systems, and Slovakia is allowed to export petroleum products made ...

However, Ukraine's state grid operator, Ukrenergo, said it received a notice from Slovakia's energy regulator about new flexible price conditions for emergency imports, Vitaliy Zaichenko, ...

By expanding solar access, families spend less of their income on energy and gain energy independence. Hydropower remains Slovakia's most ...

Slovakia, long reliant almost entirely on Russian gas, now has a unique opportunity to diversify its energy sources and strengthen national energy security. This development reduces ...

For Slovakia, energy independence may be within reach, but lower bills are not. Despite new nuclear capacity, companies still face some of the highest energy costs in the EU.

To ensure the security and affordability of electricity and heat generation, the state is poised to support renewable energy sources that do not ...

BRATISLAVA, Slovakia (AP) -- Slovakia on Monday escalated a dispute with Ukraine over oil deliveries by halting emergency electricity supplies to the country suffering from daily blackouts ...

It came at an opportune time for the Slovak Republic, which is finalising its updated National Energy and Climate Plan to 2030 towards reaching carbon neutrality by ...
