The Energy Storage Grand Challenge (ESGC) technology development pathways for storage technologies draw from a set of use cases in the electrical power system, each with their own ...

Prepared on behalf of the Clean Energy States Alliance, this Applied Economics Clinic (AEC) report lays out a framework for the execution of a thorough and robust benefit-cost analysis (BCA) of battery ...

The debate over the appropriate discount rate to use in Levelized Cost of Energy (LCOE) calculations is a pivotal one, as it significantly influences ...

Drawing on recent auction results from Saudi Arabia, India and Italy, along with in-depth interviews with project developers, suppliers and analysts across global markets, it captures the most ...

This chapter, including a pricing survey, provides the industry with a standardized energy storage system pricing benchmark so these customers can discover comparable prices at different market ...

Clean Energy February 18, 2026 New York, February 18, 2026 - Clean power costs sent mixed signals in 2025. According to BloombergNEF's Levelized Cost of Electricity 2026 report, the cost of battery ...

This paper presents and applies a state-of-the-art model to compare the economics and financial merits for GIES (with pumped-heat energy storage) and non-GIES (with a Lithium-ion ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average ...
