The company today has fuel cell projects that run on natural gas and biogas. The cells can produce hydrogen in addition to power and thermal energy. Additionally, the company is developing fuel cell-based carbon capture, long-duration energy storage and solid-oxide based electrolysis. FuelCell's proprietary technology uses carbonate fuel cells to capture and concentrate carbon di...

Detailed info and reviews on 10 top Fuel Cells companies and startups in United States in 2026. Get the latest updates on their ...

These startups develop new energy storage technologies such as advanced lithium-ion batteries, gravity storage, compressed air ...

Companies in this sector create products such as fuel cell systems, electrolysers, and hydrogen storage solutions tailored for industries like transportation, telecommunications, and medical care.

FuelCell Energy is an American clean energy company delivering continuous, scalable power to support mission critical applications and grid resilience. FuelCell Energy has released its...

Decarbonize and achieve energy independence with reliable, renewable power that eliminates dependence on imported fuels and vulnerable supply chains. Enable the transition to a ...

Explore our range of energy storage products, each designed to meet diverse needs. From 5 MW to 50 MW, FES offers scalable solutions, ...

We are the only energy storage company offering solutions encompassing short to long to ultra long duration ...

ESS was established in 2011 with a mission to accelerate decarbonization safely and sustainably through longer lasting energy storage. Using easy-to-source iron, salt, and water, ESS" iron ...
