The global energy landscape is shifting as countries weigh the costs and benefits of nuclear power versus renewable energy sources such as solar, ...

It presents the plant-level costs of generating electricity for both baseload electricity generated from fossil fuel and nuclear power stations, and a ...

WaterPower Canada (WPC) commissioned this white paper to present a comparative analysis of the current and future cost of various sources of electricity generation.

Renewables continue to prove themselves as the most cost-competitive source of new electricity generation. On an LCOE basis, 91% of newly commissioned utility-scale renewable capacity ...

This chart shows the levelized cost of energy generation by source (in U.S. dollar per MWh).

Fuel costs for nuclear plants are a minor proportion of total ...

The U.S. Energy Information Administration (EIA) retained Z Federal and Sargent & Lundy to conduct a study of the cost and performance of new utility-scale electric power generating technologies.

I crunched the numbers on replacing an APR1400 nuclear reactor (1400 MW, 95% capacity) with Vestas V236-15.0 MW wind turbines (30% ...

For utility-scale generation put into service in 2040, the EIA estimated in 2015 that there would be further reductions in the constant-dollar cost of concentrated ...
