OverviewLandPeopleEconomyAgriculture, forestry, and fishingManufacturingTradeServicesLabour and taxationTransportationThe Maldivian Islands are a series of coral atolls built up from the crowns of a submerged ancient volcanic mountain range. All the islands are low-lying, none rising to more than 6 feet (1.8 metres) above sea level. Barrier reefs protect the islands from the destructive effects of monsoons. The rainy season, from May to August, is brought by the sou...See more on britannica Author: The Editors of Encyclopaedia BritannicaWhereig Where is Maldives?
