-----

Germany has marked a significant milestone in renewable energy by producing a record 45 gigawatts (GW) of solar power on June 15, 2024. This achievement supplied about 50% of the ...

Germany's electricity generation from renewable sources reached a historic high in 2024, accounting for a remarkable 62.7% of the total share. Solar energy ...

Germany has met its target of installing 88 gigawatts (GW) of solar capacity by 2024. According to the economy ministry, installed solar systems totalled a capacity of over 90 GW by the ...

Germany has smashed through the 100-gigawatt solar barrier, joining an exclusive club of renewable energy powerhouses. With 100.8GW of operational photovoltaic capacity reached by ...

There was an unprecedented daily surge in solar-generated electricity on May 14, 2024. More than 47.1 gigawatts (GW) were fed into the grid around mid-day, according to Fraunhofer ...

M&#252;nster (Germany) - The year 2025 in Germany marks a new record year for onshore wind and solar tenders by the Federal Network Agency (BNetzA). The successful tenders from last year are ...

Germany has once again demonstrated its leadership in renewable energy by installing 16.2 GW of new solar capacity in 2024, bringing the total to an impressive 99.3 GW by the end of the ...

Solar power in 2024 meets 14% of electricity consumption in Europe's largest economy as more than a million new systems are installed

Germany's total installed solar power capacity exceeded the 100 GW mark at the end of 2024, approaching nearly half of the 215 GW goal set for ...

Germany achieved a record share of wind and solar in its electricity mix over the first nine months of 2024,

# Germany sets new solar power record

exceeding fossil fuels for the first time. New solar capacity additions in the first nine ...
