Average prices of more than 40 products and services in Myanmar. Prices of restaurants, food, transportation, utilities and housing are included.

Industrial power tariff raised to Ks900 per unit under full-time supply 2026-02-04

Myanmar's power sector continues to record losses due to a combination of several factors, including currency depreciation, increasing grid maintenance cost, and revenue decline.

These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Burma (Myanmar) with 150 other countries.

The national average electricity demand is around 4,400 MW per day, but only about 2,400 MW is currently being produced, meeting just 55% of the required supply.

Prices have been consistently decreasing since 2020 (-14%/year), after peaking at US\$5.1c/kWh. In 2024, they were nearly two times lower than in 2020, reaching US\$2.7c/kWh. The electricity price ...
