-----

Montenegro has taken a decisive step toward modernizing its power system with a EUR48 million investment in large-scale battery energy storage systems (BESS).

A levelised cost of storage (LCOS) of \$65/MWh. An all-in capex of \$125/KWh leads to a cost of \$65/MWh to move electricity, based on the latest real-world project parameters.

Planning an energy storage project? Learn how to break down costs for containerized battery systems - from hardware to hidden fees - and discover why 72% of solar+storage projects now prioritize ...

EPCG, Montenegro's state utility, aims to procure two grid-scale battery storage systems (BESS) totaling 240 MWh in a EUR48 million (\$55.9 million) tender.

The procurement, valued at EUR 48 million (USD 55.9m), foresees the construction of the storage units within the grounds of the Niksic steel mill, ...

Discover the 2025 battery energy storage system container price -- learn key cost drivers, real market data, and what affects energy storage container costs.

The estimated value of the procurement is EUR 48 million excluding VAT, according to the public call.

The new tender envisages the procurement of a battery between 100 kW and 130 kW, with 200 kWh to 260 kWh in capacity. This is a pilot project, ...

The tender's value is estimated at close to 50 million euro (\$58 million), the company said in a statement. Each facility will have a power capacity of 30 MW and energy storage capacity of 120 ...
