As data centers, EV uptake, electrification of industrial processes and other factors drive growth in demand for electricity in North America, microgrids and off-grid energy systems are seen ...

The mission is to enable the technological, operational, and business models that will help communities reduce costs, promote clean energy, and build reliability and resiliency into the grid. NY Prize is a ...

For the 2009, 2011, and 2013 competitions, Solar Decathlon sponsor Schneider Electric provided microgrid design and engineering services as well ...

Don't miss this opportunity to network with key industry leaders shaping the growing microgrid market in North America -- Contact us to arrange your participation!

Together, GOSR and NYSERDA will challenge communities, businesses, entrepreneurs and electric utilities to design and implement community-based microgrids, which offer energy independence as ...

The National Renewable Energy Laboratory (NREL) invited five teams to compete in a two-part, 21-week microgrid controller competition.

Microgrids can serve multiple roles, and they are not cheap, sometimes penciling out at millions of dollars per MW. Collaboration with all facets of engineering and ...

A first-in-the-nation \$40 million competition is planned to help communities create microgrids--standalone energy systems that can operate independently in the ...

Design 100% carbon neutral microgrids at the lowest cost. More than 215,000 microgrid and DER designs have been optimized through Xendee. Minute-by ...
