Renewables-based microgrids and peer-to-peer (P2P) energy trading can boost energy security as they are self-sufficient and run independent of large grids.

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.

Pakistan's unstable electricity supply has driven a boom in private adoption of solar power - but it could further destabilize the national grid.

Germany is the fourth-largest economy in the world and ranks 11 out of 120 countries on the ETI 2023. Since 2014, Germany's score on the ETI has increased by 6%, which shows both the ...

Pacific small island states, contributing only 0.03% of global emissions, are leading with ambitious renewable energy projects and net-zero goals by 2050.

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

Amid an electricity crisis, many Nigerian small businesses run on petrol generators. This solar-microgrid start-up is working to connect them to clean energy.

Tennessee's Chattanooga Metropolitan Airport recently became the first U.S. airport powered by 100 percent solar energy. Started in 2010, the \$10 million microgrid project includes a ...

Solutions like demand-side response (DSR) can provide energy flexibility and security, according to the World Economic Forum's Energy Transition Index 2025.

Microgrid photovoltaic power generation forecast

XENDEE is the team and technology supporting distributed energy and microgrid energy solutions. It is a comprehensive distributed energy resource (DER) design and operation software platform. Its ...
