---

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. Data collection for the NSRDB is a ...

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities -- ...

Reliable solar and weather data provides accurate performance monitoring for 360 community solar garden locations, reducing stress on electric grids and making ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

Free and open access to photovoltaic (PV) electricity generation potential for different technologies and configurations. Available in English, French, Italian, ...

PV-Live: This dataset provides real-time data on solar energy generation in the United Kingdom. It includes data on the total amount of solar energy generated, ...

# National Standard Solar Photovoltaic Power Generation Atlas

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.
