The U.S. energy storage industry has entered a "new phase of sustained, high-volume deployment," according to the inaugural Energy Storage Market Outlook Q1 2026 released by the ...

Energy storage can provide multiple grid services. It can support grid stability, shift energy from times of peak production to peak consumption, and reduce peak demand. Solar-plus-storage ...

The North American market for photovoltaic energy storage integrated with hydrogen production and hydrogenation systems is experiencing rapid growth driven by the increasing ...

The National Renewable Energy Laboratory (NREL) publishes benchmark reports that disaggregate photovoltaic (PV) and energy storage (battery) system installation costs to inform SETO's R& D ...

Recent weeks have seen a flurry of announcements concerning financing facilities for major solar and storage projects. Such schemes are extremely fashionable, particularly in the US.

Investor-owned utility (IOU) Southern California Edison (SCE) is seeking expedited approval from the California Public Utilities Commission ...

The Sunstone project has a proposed capacity of 1.2GW of solar and 1.2GW of battery energy storage capacity. According to reports, the acquisition ...

The report includes comprehensive analysis of deployment trends, market sizing, and growth projections for utility scale and behind the meter segments, in addition to an energy storage ...

World's largest solar-plus-storage site with 3.5 GW capacity confirms safe grid connection The development builds on MTerra Solar's continued progress for its Phase 1.

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the

Photovoltaic energy storage settled

United States in 2026, marking the largest annual increase in more than two decades ...
