North America remains the largest market for photovoltaic inverters, driven by strong regulatory support and consumer demand. The Asia-Pacific region is the ...

The PV inverter market was estimated at USD 48.3 billion in 2025 and is expected to grow at a CAGR of 7.2% from 2026 to 2035, driven by the rapid expansion of utility-scale and distributed solar installations.

Wood Mackenzie employs a bottoms-up modeling methodology to capture, track and report national average PV system pricing by segment for systems installed each quarter.

The PV inverter market demonstrates continuous growth because of world progress towards renewable energy and the growing installation of solar photovoltaic (PV) systems in ...

With less initial cost per watt than micro inverters and easier installation than central inverters, string inverters find a balance between ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

PV Inverter Market Summary The global pv inverter market size was estimated at USD 13,088.5 million in 2023 and is projected to reach USD 41,869.7 million by ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

The global Solar PV Inverter Market size was valued at USD 16.3 Billion in 2024 and is projected to reach from USD 17.96 Billion in 2025 to USD 39.07 Billion by 2033, growing at a CAGR of 10.2% ...
