---

It is an automated production equipment capable of string welding PV crystalline silicon solar cells, characterized by high production capacity, high precision, and high compatibility.

Solar cell welding machine OCH1500 can be integrated with automatic layup machine to achieve the composing and locating of solar cell strings on tempered glass. Update the traditional PV ...

Tabber Stringer Machine is used to weld solar cells to strings; Solar cell stringer machine OCH1500 adopts IR soldering method, servo motor driving and ...

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the ...

The solar industry continues to evolve rapidly, with string welding machines playing a critical role in solar panel manufacturing.

A solar panel stringer machine can help you create a highly efficient photovoltaic (PV) system that maximizes your energy savings. It can be used with various PV systems, including those ...

In the manufacturing process of photovoltaic modules, the series welding of solar cells is a key link in determining the performance and reliability of the modules. High-speed string er ...

String welder is the equipment that connects the cells in series to obtain high voltage, and it is also the equipment with the highest technology and value in the PV module ...
