Beyond rooftops, photovoltaic brackets are used to mount panels on carports and shade structures. These installations provide dual benefits: shelter and energy generation.

Overview Mounting Orientation and inclination Shade PV Fencing Sound barriers See also The solar array of a PV system can be mounted on rooftops, generally with a few inches gap and parallel to the surface of the roof. If the rooftop is horizontal, the array is mounted with each panel aligned at an angle. If the panels are planned to be mounted before the construction of the roof, the roof can be designed accordingly by installing support brackets for the panels before the materials for the roof are installed. The ins...
