-----

The Sodium-ion Alliance for Grid Energy Storage (SAGES), led by PNNL, will focus on demonstrating high-performance, low-cost, safe sodium-ion ...

New developments in sodium battery materials have led to developments that could pave the way for lower-cost sodium-ion batteries that ...

American battery startup Peak Energy and energy developer Jupiter Power have teamed up to deploy grid-scale sodium-ion batteries. It's a big step forward for the nascent--and in some ways,...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points ...

Sodium-ion batteries (NIBs) are touted as an attractive grid storage technology due to their elemental abundance, promising electrochemical performance and environmentally benign nature.

Sodium-ion's debut in American grid storage marks a significant step forward, but widespread adoption is far from guaranteed. The technology shows promising advantages for ...

Peak Energy activates a first-of-its-kind sodium-ion battery in Colorado, aiming to cut energy costs and boost US grid reliability.

Sodium-ion battery named 2026 breakthrough by MIT Technology Review. Explore grid-scale energy storage, AIDC backup power, and Veken's GWh production.

Peak Energy has shipped the US's first grid-scale sodium-ion battery. With passive cooling and NFPP chemistry, it targets cheaper, safer ...

Sodium ion batteries (NIBs) and its development shows great promise for grid energy storage applications as

# Sodium-ion energy storage grid

an alternative to conventional lithium ion batteries (LIBs).
