The present invention relates to a method for powering a motor directly from a photovoltaic module, wherein the motor is adapted to drive a piston compressor pump, the method comprising the steps...

Direct drive systems, which run up to 12 hours per day even in low-light ...

The new solar direct drive (SDD) and weak grid power management system designed by Secop consists of the new generation SDD Power Management Module (101N3110), the new MB3CKV (109M0860) ...

TurboAir is a solar-powered aeration system, providing an environmentally sensitive alternative to traditional power sources. Specifically designed for high-pressure situations, ensuring ...

In March 2010, the World Health Organization (WHO) prequalified the Solar Direct Drive, a refrigeration system which utilises the solar array to ...

Solar Direct Drive system is an advanced solar-powered vaccine refrigeration solution that operates without batteries, offering unmatched temperature stability, zero freezing risk, and autonomous ...

The Solar Direct Drive solutions consist of several vaccine refrigerators and freezers directly connected to solar panels without the use of batteries and ...

Solar direct drive pumping system uses a DC brushless motor, high efficiency, and low energy, well pump solar panels, which can be directly connected to the drive pump.

Solar-powered aeration offers a green energy alternative without sacrificing performance. With our high-output compressors, we produce ample air to meet ...
