With solar and energy-saving cookers, reforestation projects as well as education and awareness-raising measures, ADES protects nature and creates perspectives on poverty and rural exodus.

Our initiatives focus on harnessing the abundant solar energy in the region to power schools and homes. Through our work, we are not only ...

The film explores the global impact of solar energy, with a spotlight on SUM's work in Madagascar where solar innovation meets education, nutrition, and community resilience.

o Solar irradiation : an average of more than 2800 hours of sunshine per year, with peak levels reaching 5 to 6 kWh/m²/day in some regions. o Extreme heat : temperatures can exceed 35°C ...

Global South Utilities (GSU) has secured agreements with Madagascar to develop a 50 MW solar plant and a 25 MWh battery energy ...

This analysis explores Madagascar's market dynamics and outlines how a local solar module factory can be strategically positioned to serve two ...

With a capacity of 40 MWp, the Moramanga solar power plant is part of an ambitious policy for sustainable development and combating climate change, while offering a viable long-term ...

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential ...

In January 2023, UNICEF Madagascar took a significant step towards sustainability by transitioning to solar power in our field offices. This ...

Solar energy for the environment madagascar

At Solarvance, we design resilient, weatherproof, and island-optimized solar systems for regions like Madagascar. Whether for a fishing village near Tul#233;ar, a school in Fianarantsoa, or a clinic in the ...
