Global solar installations have been compounding, yet most solar glass capacity and HPQ processing remain heavily concentrated in a few regions. That concentration creates fragility: long ...

The Indian government has imposed a definitive anti-dumping duty on imports of solar glass (textured tempered coated and uncoated glass), ...

In this article, it will be argued that the current crisis in the smart glass industry is not only due to poor marketing, high prices and high barriers to entry in the construction industry.

Thin film PV and CSP technologies will drive the demand and capacity increases in float assets; until volume is sizable it is difficult to dedicate float lines to the solar industry

Is solar glass still a promising technology? Despite its potential, solar glass has not yet reached critical mass. However, with new policies set to ease China's solar production constraints, we check in on ...

Solar PV glass, a critical component in solar panels, is essential for converting sunlight into electricity. This rising demand for renewable energy, fueled by ...

Besides influencing First Solar and its growing glass supply chain, policies such as the U.S. Inflation Reduction Act (IRA), are also spurring ...

Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market. Additionally, the market for solar PV glass is ...

This surge is directly tied to innovations in photovoltaic (PV) glass--a critical component for solar panels. Governments worldwide are rolling out new policies to accelerate adoption.
