Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

These case studies offer valuable insights for local governments and other stakeholders who are interested in pursuing large-scale solar projects in their communities.

Since 2020, DOE's Energy Information Agency has hosted an interactive database with coordinates of the central point of large-scale solar ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

In this article, we'll explore the state of large-scale solar projects in the U.S. for 2025, highlight key growth drivers, and explain how Solargy Power Solutions helps clients succeed in this ...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

# Solar power generation for large-scale projects in my country

Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. While residential solar is most ...
