Researchers found 46 new vulnerabilities in solar power systems, some of which could be used to hijack entire fleets of inverters. Inverters also ...

The three largest manufacturers of solar inverters have been found vulnerable to remote sabotage that could have produced large-scale power ...

Researchers at Australia's Commonwealth Scientific and Industrial Research Organisation (CSIRO) have mapped out a scenario in which smart ...

Solar inverters can be vulnerable to cyberattacks under certain conditions, such as connecting without a password. Successful hacks can lead to instability in solar farms and grids, ...

Security researchers at Forescout Vedere Labs have identified 46 critical vulnerabilities in solar inverters manufactured by three leading solar ...

Researchers at Forescout Vedere Labs have uncovered 46 security vulnerabilities, collectively named SUN:DOWN, affecting solar inverter products from Sungrow, Growatt, and SMA.

The incident exposed a chilling reality: Chinese-made solar inverters, critical components in renewable energy systems, contain hidden ...

In the full report, Forescout reviews known issues and presents new vulnerabilities found on three leading solar power system manufacturers: ...

Recent discoveries reveal that Chinese-made solar inverters-devices critical to energy conversion and transmission-may come with ...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to

review renewable tech security.
