-----

Spanish solar developer MASPV partners with Chinese clean-energy group Shanghai Shaanyao to unlock financing and technology for large-scale green hydrogen projects in Spain.

The increasing integration of renewable energy sources (RES) in Spain is leading to substantial amounts of surplus electricity, presenting a strategic opportunity for green hydrogen ...

Green-hydrogen power, produced from renewable-energy sources such as wind and solar, has emerged as a promising solution in the global shift ...

This work studies the potential of hydrogen production from surplus electricity, in line with Spain's ambitious decarbonization goals. By simulating the planned 2040 electricity system with ...

Spain's green hydrogen potential is well-documented, with energy company Cepsa announcing plans to build a 200MW solar plant in the country ...

Spanish company FRV aims to hybridize its Spain-based solar portfolio and increase its battery energy storage (BESS) capacity in the country. The developer says its projects are in an ...

But here's the twist - Spanish engineers are fighting back with 'hybrid storage systems' that combine batteries and hydrogen, like renewable energy's version of Batman & Robin.

It is the first industrial implementation of the HyDeal Ambition platform, and the first mass-scale competitive hydrogen hub. The project integrates dedicated ...

A solid network of hydrogen infrastructures will be essential to store and transport hydrogen in the most efficient way from the places where it is ...
