Solar Energy in Thailand has jumped from a policy aspiration to an active economic strategy. Over the past decade, the kingdom has shifted from ...

Although Thailand's clean energy progress still lags behind, there's still hoped to catch up with the world. Despite past efforts to promote clean ...

Increasing energy storage capacity will be critical for integrating higher volume of renewables specifically solar in Thailand's power system. In April 2023, Thailand awarded project rights for 1GW of solar ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the ...

Energy Policy for 2025: The government aims to promote clean energy while also securing new domestic energy sources. At the same time, the three electricity ...

NEP will serve as the country's framework for energy transition towards carbon neutrality target, which consisted of 5 sub sectoral plans: Power Development Plan (PDP), Alternative Energy Development ...

To advance its energy transition, Thailand has developed several key policies including the National Energy Plan (NEP) and sub-plans such as the Power Development Plan (PDP), the Alternative ...

In its announcement regarding 2025 investment plans, PTTEP shared that it will support investment opportunities in offshore wind farms, carbon capture and storage as a service, hydrogen fuel ...

Greater use of renewable energy, better power supply management and a fresh attempt to adopt nuclear energy are emphasised in the new PDP.

Thailand s 2025 PV and Energy Storage Plan

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...
