Looking ahead, the EU should apply the lessons from Ukraine to strengthen its own energy system - building resilience and removing structural vulnerabilities. One critical area is in the ...

Since the beginning of the full-scale Russian invasion and targeted attacks on the energy sector, decentralised solar energy and residential solar panel installation securing the electricity supply have ...

The IEA estimates Ukraine would need to add around 4 GW of distributed PV per year until 2030 (over 24 GW in total) to create a more decentralised and secure ...

Solar power plants installed at three water and wastewater utility sites in Chortkiv, Western Ukraine, support uninterrupted water services to ...

By promoting solar energy alongside Battery Energy Storage Systems (BESS) and smart grid integration, the initiative aims to create a stable ...

The Chairman of the Board of the Solar Energy Association of Ukraine (SEAU), Vladyslav Sokolovskyi, spoke live on the Pryamyi TV channel, outlining the current state of Ukraine's power ...

The team builds solar power plants across Ukraine -- from Dnipropetrovsk to Odesa and Mykolaiv regions. The Zakarpattia project will become one of the largest in the company's portfolio and a key ...

In their study, the researchers explain why renewables should take centre stage in the reconstruction of the Ukrainian electricity system. Using ...

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

Ukrainian integrated solar power supply system

Ukraine's energy system is acting as a frontline test of resilience under direct attack. The solutions it is deploying should be seen as evidence of why electrification is becoming central to ...
