The photovoltaic effect is a physical phenomenon in which a semiconductor material generates electric energy upon being exposed to light. The photovoltaic effect is closely related to the photoelectric effect. For both phenomena, light is absorbed, causing excitation of an electron or other charge carrier to a higher-energy state. The main distinction is that the term photoelectric effect is usu...

Sun, color, and finishes: why some pants feel hotter outdoors If you work in direct sun, color and surface treatment can make construction pants overheat faster than you would expect. ...
