Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

The following resources provide information on a broad range of storage technologies.

In 1H25, global small-scale storage cell shipments reached 21.64 GWh, up 72.38% YoY. In 2Q25 alone, shipments exceeded 10 GWh -- the highest single-quarter delivery in nearly three ...

To define, describe, and forecast the battery energy storage system (BESS) market in terms of battery type, energy capacity, ownership, connection type, ...

The global energy storage systems market recorded a demand was 222.79 GW in 2022 and is expected to reach 512.41 GW by 2030, growing at a CAGR of ...

In 2024, in the domestic market, the top ten Chinese companies by shipment volume of energy storage systems were: CRRC Zhuzhou Institute, Sungrow, Envision Energy, HyperStrong, ...

Asia Pacific dominated the battery energy storage market with a share of 34.29% in 2025. Battery energy storage or BESS is a modern energy ...

At present, most non-China cell shipments from Chinese-funded manufacturers are achieved through the commissioning of non-China energy storage projects by leading Chinese system integrators.

Globally, annual energy storage deployment (excluding pumped hydropower plants) is set to hit another all-time high at 92 gigawatts (247 gigawatt-hours) in 2025 - 23% higher than in 2024. ...
