Minimize Voltage DropMinimize Power LossSafetyVoltage DropPower LossSummaryOhm's law is used to calculate the voltage drop in a wire. The equation is: Volts = Current (Amps) x Resistance (Ohms) Here are the common resistance values for copper wire and their NEC "not to exceed" Ampacity: Using the table above, you can calculate the voltage drop from your wind turbine to the rectifier or battery bank using the following [ste...See more on windnation](#)
