John Bannister Goodenough was a 2019 Nobel Prize winner in Chemistry and the man who invented the lithium-ion battery.

Among the people that contributed to this success from this beginning up to now, Michel Armand has played a key role in the creation and development of lithium-ion battery cathodes, anodes, and ...

It was manufactured in small volumes by Exxon, appeared at an electric vehicle show in Chicago in 1977, and served briefly as a coin cell ...

John Goodenough, an acclaimed scientist and recipient of the Nobel Prize, is known for his groundbreaking work in the invention of the lithium-ion ...

M. Stanley Whittingham's Pioneering Work: Whittingham, working for Exxon in the early 1970s, created the first rechargeable lithium-ion battery using titanium disulfide as the cathode and ...

None the less the debate continued, over who developed the lithium-ion battery first. In 2019, the Nobel Foundation awarded the Nobel Prize in ...

The origins of the lithium-ion battery are intimately associated with the discovery and development of fast ion transport of ions in solids. Whereas, Volta originated the study of batteries, it was Michael ...

The first commercially viable lithium-ion battery was developed in 1985 by Akira Yoshino, and the first mass-produced lithium-ion battery entered ...
