Nickel was discovered by the Swedish chemist In the 1890s, Ludwig Mond discovered a process to extract and purify nickel Axel Fredrik Cronstedt in the mineral niccolite oxides to pure nickel in what ...

OverviewHistoryPropertiesCompoundsCoinageWorld productionProductionApplicationsUnintentional use of nickel can be traced back as far as 3500 BCE. Bronzes from what is now Syria have been found to contain as much as 2% nickel. Some ancient Chinese manuscripts suggest that "white copper" (cupronickel, known as baitong) was used there in 1700-1400 BCE. This Paktong white copper was exported to Britain as early as the 17th century, but the nickel content of this alloy was not discovered until 1822...

The name is the shortened for of the German "kupfernickel" meaning either devil's copper or St. Nicholas's copper. Element Nickel (Ni), Group 10, Atomic Number 28, d-block, Mass 58.693. ...

The story of nickel begins centuries before its scientific identification, rooted in the frustration of German miners in the Erzgebirge region of Saxony. These miners frequently ...

Nickel was discovered in Sweden by Axel Fredrik Cronstedt while studying the ore miners called kupfernickel. On the element 28 periodic table, nickel carries the symbol Ni and sits ...

The chemical element nickel is classed as a transition metal. In the 1750s nickel was discovered to be an element by Axel Cronstedt.

Elemental nickel very sparingly occurs together with iron in terrestrial and meteoric deposits. The metal was isolated (1751) by a Swedish chemist and ...

Today is the birthday of Axel Fredrik Cronstedt, a Swedish chemist born in 1722 who is best known for his discovery of nickel and his mineral ...
