-----

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more. A wind project ...

Recently, some media reported that China has successfully completed the construction of the world's first sail-powered freighter "Kaili". This news shocked the world shipbuilding industry. ...

In this study, following the prediction of future power generation using the LSTM-KAN model, the projected wind and photovoltaic (PV) generation outputs were incorporated as ...

An autopiloted, kite-based wind-energy generator pairs with its 400 kilowatt-hour battery pack for renewable, portable baseload power.

Overall, the summarization of wind energy here consists of four aspects: (1) wind turbine structure, (2) wind power generation technologies, (3) wind energy assessment methodologies, (4) ...

Advances in wind-energy technology have decreased the cost of wind electricity generation. Government requirements and financial incentives for renewable energy in the United ...

China has successfully completed the first flight of its home-designed floating wind turbine, the S1500, in Hami, Xinjiang. The system passed ...

Wind energy added 113 GW of new capacity in 2024 alone, growing by 11.1% compared to the previous year. By 2024, onshore wind capacity had grown significantly since 2015, reaching 1 053 GW while ...
