Develop a national database of hourly and 5-min plant-level power time series starting with year 2018 using different wind speed data sources, in addition to a ...

Wind speed and generation estimates are provided at almost all wind plants in the contiguous United States for the years 2018-2021. The data in PLUSWIND is ...

Looking for archive data? No Data Available.

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

This report is published each hour and includes System-wide and geographic regional hourly averaged wind power production, forecasts, and the High ...

The repository contains wind speeds and generation based on three different meteorological models: ERA5, MERRA2, and HRRR. Data are publicly accessible in simple csv files.

System-wide actual hourly averaged wind power potential (HSL) for a rolling historical 48-hour period is also included. Our forecasts attempt to predict HSL, which is uncurtailed power ...

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets.

Historical hourly time series of wind and solar generation profiles for every plant within the United States (US) that is part of the Energy Information Administration (EIA) 2020 dataset for the ...
